The program

- 1) What is Autism Spectrum Disorder (ASD)?
- 2) What is Applied Behavioural Analysis (ABA)?
- 3) Research and outcomes
- 4) Teaching and Reductive Methodologies (Eg. DTT, VB, NLP and Functional Analysis)
- 5) What's involved in starting a program (Assessment, Therapist Recruitment, Resources, Curriculum Development, Supervisor vs parent directed programs)

The speaker

Leslie Workmon, *B.A. Psych.*, is a Behaviour Analyst with over 10 years experience working with children with Autism. She has designed and implemented unique and innovative in-home and school-based ABA programs for numerous families throughout the world with great success. Applied Behavioural Analysis (ABA) is a scientifically proven early intervention treatment for children with Autism.

Leslie has previously worked for the Center for Autism and Related Disorders (C.A.R.D. (U.S. and Aust)) as Senior Therapist, Case Supervisor and Clinic Director. She was the CARD Employee of the Year for 1995. Leslie holds the distinction of being the first ABA practitioner to introduce ABA programs in Victoria in 1995. In 1997, Leslie established the first ABA clinic for children with ASD in Brisbane.

Funding & support

The Queensland Government's Gambling Community Benefit Fund provided funding to ABIQ to conduct a series of information seminars and workshops on Autism. This workshop is part of that series. The Gambling Community Benefit Fund improves the lives of Queenslanders through investing in Queensland's communities.

This workshop is proudly supported by Griffith University.
